WINCORE[®]
WINDOWS & DOORS
The way it should be.[™]

THE WINCORE® ADVANTAGE

Beauty

You never get a second chance to make a great first impression. That's why Wincore's® Entry Systems are thoughtfully designed with enhanced details to greet your guests with classic elegance and style.

Durability

At Wincore®, we take pride in delivering entry systems that feature only top quality construction, made with the finest materials. Each and every one backed by our Lifetime Limited Transferable Warranty.

Security

Your security and safety is one of our main concerns. That's why we chose to utilize only the most respected names in hardware like Schlage™ and W&F for all handlesets and locking mechanisms.

Energy Efficiency

Today, energy efficiency is more important than ever. That's why Wincore® Entry Systems are ENERGY STAR qualified. Choosing ENERGY STAR products for your home helps save on heating and cooling costs year round, as well as providing you with a more comfortable living space and added appraisal value to your home.

Decorative Glass

Exceptional quality decorative glass doorlites, sidelites and transoms take style and sophistication to a new level.

- Artistically designed patterns
- Assembled by skilled craftsmen
- Precise cutting, mitering and soldering
- Made with hand-made glass panels

Decorative glass achieves visual character through aesthetic imperfections that mimic hand-made sheet glass of centuries past – each exhibiting textural waves and striations, random seeds (air bubbles) and a variety of other natural effects.

Quality Construction

Features

PATENTED HYDROSHIELD TECHNOLOGY™

Exclusive Hydroshield Technology™ features fiberglass reinforced door skins, full-length composite stiles, and composite top and bottom rails to prevent water infiltration on all six sides.

FULL LENGTH COMPOSITE TOP AND BOTTOM RAILS

Additional non-porous protection keeps water from seeping into the door and helps prevent the build up of mold or mildew.

FIBERGLASS REINFORCED SKIN

Fiberglass is unmarred by the wear and tear of everyday use and is unaffected by moisture and humidity. The doors will not rot, splinter or warp like wood, and won't dent or delaminate like steel.

FULL LENGTH COMPOSITE STILES

All Wincore® fiberglass entry doors feature fully composite stiles to prevent water infiltration into the door's insulation – ensuring the door will never warp, rot, or rust.

ARCHITECTURALLY CORRECT PROPORTIONS

Beautifully detailed panels are identical to traditional wood door construction to create crisper shadow lines and heightened curb appeal.

INSULATED CORE

Environmentally friendly insulation is 100% CFC-free and provides a high R-value for maximum thermal protection.

6/8 & 7/0 DOOR

8/0 DOOR

Durable Frame Technology

All Wincore® Entry Door frames are guaranteed for life, against rot, decay and insect damage. Exceptional finishing qualities and enhanced performance features ensure a lifetime of dependability.

- Incredible strength, year after year.
- Resistance to wear, splitting and impact.
- Excellent nail and screw holding strength.
- Great paint, stain and glue adhesion.
- Superior machining and sanding ability.

Rot-Free Brickmould

Provides a beautiful transition from the frame of the entry door to the exterior of the home. Constructed of a durable composite material, this brickmould design resists rot, decay and damage from insects.

Advanced Sill Design

All Wincore® Entry Door systems feature an innovative sill design that guards against leaks. As air pressure increases on the outside of the home, the compression corner seal forces any water to flow up the interior column of the closed-cell foam weatherstrip – preventing the water from entering the home. This proven technology produces performance superior to that of traditional Q-Ion seals.

Innovative Threshold

The wide, composite substrate of the sill provides years of dependable, rugged performance. In addition, the High Dam Technology of the threshold cap offers improved resistance to air-driven water, as well as guarding against moisture penetration.

Ball Bearing Hinge System

All hinges feature four-point attachments to the door and door frame for a lifetime of dependability. Available in a variety of finishes.

Energy Performance

Great design includes both beauty and performance. Homeowners are increasingly defining performance as energy conservation and cost savings. That's why Wincore® offers a full collection of doorlites with features that conform to Green Building Principles of natural light, energy efficiency, solar heat gain control and indoor air quality.

Natural Light

Doorlites provide daylighting, allowing for reduced consumption of electricity.

Triple-Pane Insulated Glass

Up to 25% more energy efficient than dual-pane glass. Available on decorative glass and Harmony blinds.

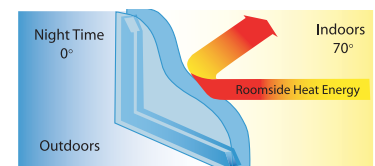

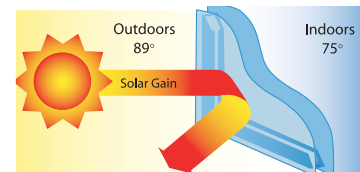

Blinds and Shades

Located between the glass panes, blinds and shades control solar heat gain for year-round comfort and are dust-free for healthier indoor air quality.

Low E Glass

Performance glass option available in clear, blinds and grilles-between-glass product offering.

Low E is a high performance glass made with an invisible thin metallic coating that blocks heat flow. A proven energy saver, Low E glass reduces air conditioning costs by reducing solar transmissions in the summer. In winter, it reduces heat loss to the outside and allows solar energy to pass inside. Low E glass is available in Contour Bar GBG in both Colonial and Prairie patterns, as well as clear glass and blinds.

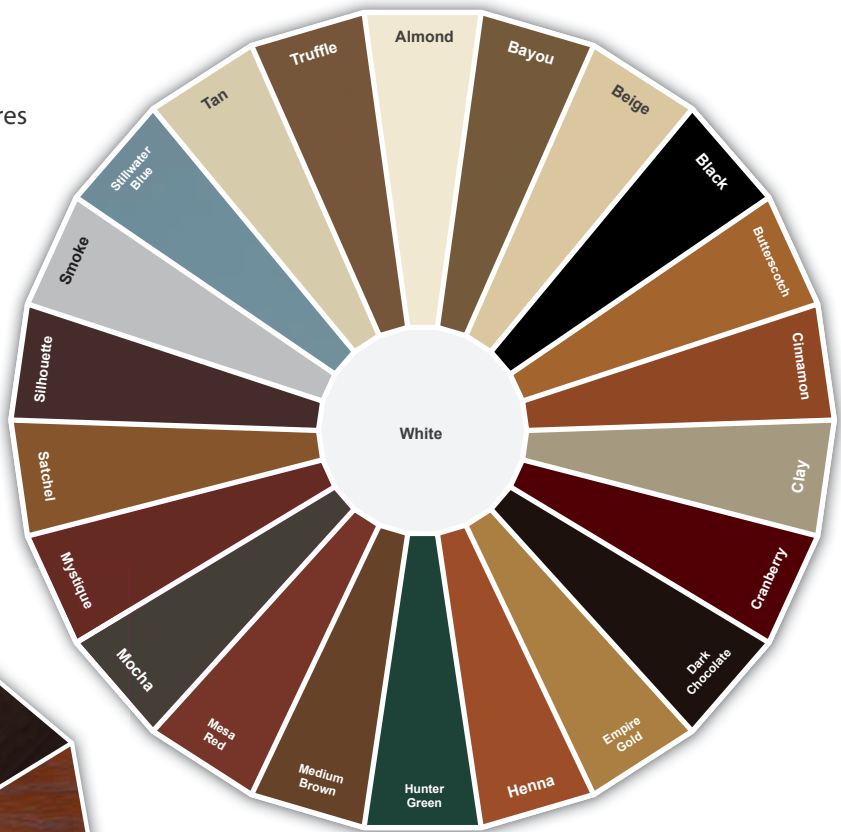

Door Finishes

Paint Colors

Choose from 20 standard paint colors.

- State-of-the-art HVLP Paint Application
- 7-year Finish Warranty – Smooth
- 10-year Finish Warranty – Woodgrained Textures

Casing Options

We add the finishing touch on the inside of your entryway with our beautiful interior casing.

Pre-mitered, ready-to-install and available for any door configuration including transoms. Comes in all paint and stain colors to match any of our door finishes.

Stain Colors

Choose from ten standard stain colors.

- Coating System:
 - Excellent Humidity and Color Stability
 - Environmentally-friendly Waterborne Material
 - HAPS (Hazardous Air Pollutants) Free
- 10-year Finish Warranty

Doors without Glass

Entry Doors from Wincore® are available in smooth or woodgrain textures. All can be painted or stained in your choice of colors.

8/0 Doors

Trilennium™ Multi-point Hardware

Trilennium™ Multi-point hardware system provides more than just security. It offers homeowners better door closure and sealing than a single point lock.

All three points latch and all three points deadbolt with a 1" throw.

Top and bottom latch design allows for door misalignment and 3/16" pull-in when dead bolted.

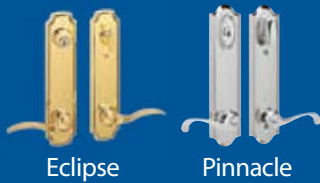

Release of the latch and deadbolt is a single downward movement.

Deadbolts include anti-saw hardened steel pin.

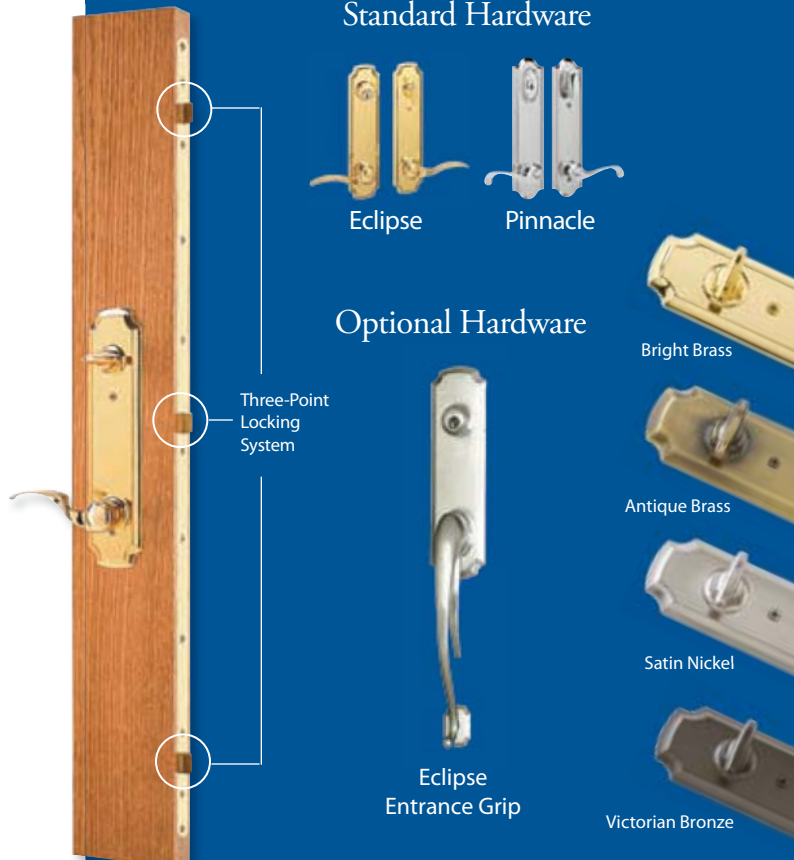

Lifetime* finish warranty and 10-year warranty on materials and workmanship.

Hardware available in your choice of Bright Brass, Antique Brass, Victorian Bronze or Satin Nickel.

Victorian Bronze

Wincore® 8-foot entry doors are reinforced with steel on the lock side for added strength and security.

8/0 Doors

Available Sizes

All Wincore® 8-foot doors feature a woodgrain texture for a classic appearance. Choose from all paint colors and stain finishes.

On the 7 Panel Center Arch, choose this decorative Brentwood pattern.

On the Camber Top Plank Door, choose the decorative Camelia pattern. The wrought iron is located between the glass panes.

French Doors

All Wincore® Entry Door systems are available as French Double Doors. When ordered in this style, Entry Doors feature a color-matched Astragal pre-assembled into the door frame. When locked using the durable steel lock pins at the head and sill of the unit, the Astragal keeps one panel of the Entry System locked in place, while allowing the other door panel to open and close. With the Astragal unlocked, both door panels open and close freely. Operating sidelites are also available – perfect for those openings too small for double doors but where a larger opening might be useful.

On French Double Door Systems, Astragals are locked and unlocked with fingertip adjustments.

Patio Doors

Patio Doors are available in a two panel or three panel door configuration. On two panel patio doors, one panel is operational (inswing only) while the other remains fixed. On three panel patio doors, two panels remain fixed while the remaining panel is fully operational (inswing only). A heavy duty top-hung aluminum screen frame (available in seven popular colors) with fiberglass mesh allows for virtually effortless ventilation. Also available with the three decorative glass patterns shown, or select from any of the decorative glass patterns that fit Full Lite door styles on the following pages.

Severe Weather Glass

Heirlooms

The Heirlooms pattern blends traditional imagery with advanced security and safety. Clear cluster bevels surround glue chip and granite glass patterns with satin nickel caming. Behind the exterior pane, a clear laminating layer helps to guard against the glass breaking apart, even when struck with force. This difficult-to-penetrate layer helps deter forced entry and adds an additional layer of sound control.

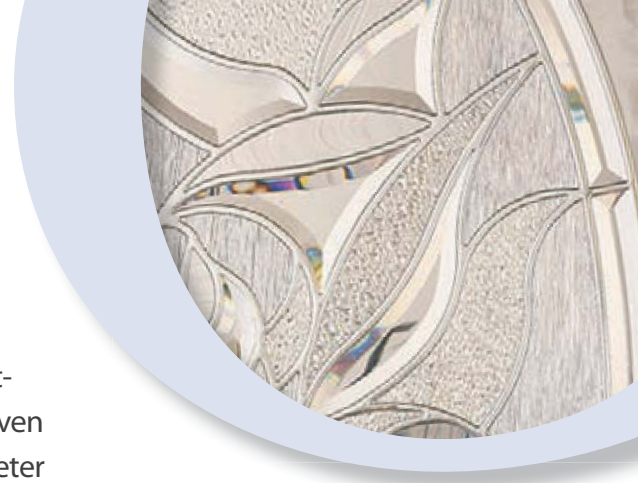

Satin Nickel

Impressions

Demonstrate your contemporary style with the Impressions glass pattern. Clear bevels with iced granite, streamed and clear renaissance glass combine with platinum coming to create a soft, sculptural pattern. Behind the exterior pane of glass, the strength of the Impressions pattern is clear. A laminating layer helps guard against the glass shattering into pieces, even when struck with force. This difficult-to-penetrate layer helps deter forced entry and also adds an additional layer of sound control.

Platinum

Decorative Options

Internal Blinds

White aluminum blinds can be sealed behind the glass for a seamless appearance.

- No more dusting or damaged blinds.
- Added privacy, security and light control.
 - Lets you control solar heat gain.
 - Low E glass on select sizes.
- Easy tilt, raise and lower operation.
 - White only.
- 10 year warranty

Clear Glass

Low E Glass

QuickShip

No More Dusting

Aluminum blinds are sealed between two panes of tempered glass.

Control light and privacy with easy fingertip adjustment.

Harmony Blinds

Internal Contoured Grilles & Blinds

QuickShip

Contoured grilles and aluminum blinds are both placed between the panes of glass.

- Superior energy efficiency – exceeds Energy Star® thermal requirements*.
- Reduces outside noise intrusion*.
- Blinds are hidden when fully raised.
- Reduced travel operator.
- Easy operation – single operator to raise, lower, and tilt blinds
- 10 year warranty

** Based on independent lab testing of U-factor and STC ratings.*

No More Dusting

The U-Factor indicates the rate of heat loss of a door assembly. The lower the U-factor, the better the insulating value and the lower the heating bill. STC ratings indicate a building material's ability to reduce sound penetration; the higher the STC, the more effective the barrier against sound penetration.

Pet Doors

- Flexible, soft flap with UV protection.
- Durable, paintable white plastic frame.
 - Snap-on interior cover.
 - Pre-installed.
 - For flush door panels only.
- Glass options limited to 1/4- or 1/2-lite configurations.

Interior with Cover Plate
